

PROTECT YOUR PUMP!

WEATHER PROOF

The one piece polyethylene construction is durable, impact resistant, rust proof, non-conductive and the best way to protect your pump from the weather elements adding years to the life of your pump.

EASY TO INSTALL

In just a few simple steps, this pump house can be installed by anyone in a matter of minutes.

TAMPER PROOF

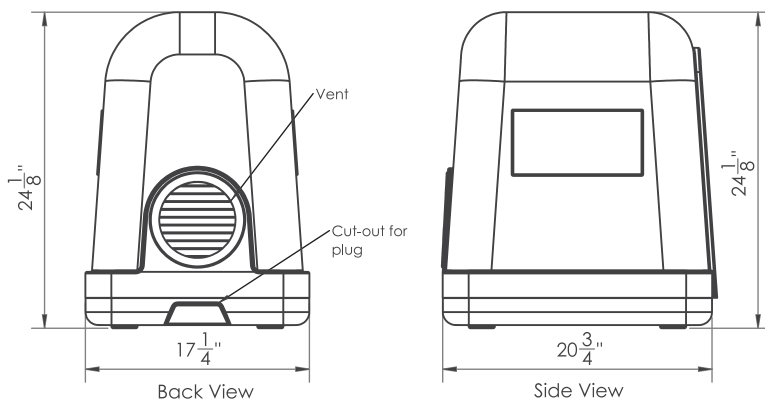

Cover fits securely on the base to prevent unwanted access to your pump. The base also has optional holes to secure it to a solid surface, providing added security.

DESIGN

Designed with versatility in mind as it is compatible with most centrifugal and jet pumps with smarthead/ pump controller set up. Helps reduce travel of noises from your pump. Base designed to keep the pump off the floor.

FEATURES

Includes a large water resistant ventilation window for proper air circulation and motor function. It also has a wide access point for your discharge line.
